Parts of the staging field will carry a GPS. Runners who this concerns will be informed on a separate list later. If you are chosen to carry a GPS, this is compulsory.

Special rules which concerns price money

To be able to receive price money you have to follow these rules:

- Runners who have not entered or have not finished one of the days, may only participate in the following days without competing. However such runner will still keep the received price money from previous days. Do observe that runners who have ran the whole course but been

disqualified are still allowed to keep on competing as usual. This rule ensures that every single runner starts with the same basis.

- Personal attendance at the flower ceremony is compulsory and if this is not followed the runner will not receive the price money distributed on the ceremony. The flower ceremony is arranged at the Arena close to the finish as soon as the result is settled. The price money of the day is given during the flower ceremony at the Arena and concerns 1st to 3rd place.

The winner of HD 21 E each day will also be celebrated at usual price giving ceremony along with the other winners of the day at the O-ringen stage each evening. The sprint is an exception since it only has a price ceremony at the Arena directly after the race.

- A special form for payment of price money must be filled and returned to the elite information before leaving O-ringen (Friday 24/7). The form can be collected at the elite tent at the arena.
